Alt Lake City is more than just the urban center—it's the area stretching along the I-15 Corridor following the stunning Wasatch Range to the east and the shimmering blue waters of the Great Salt Lake to the west.

STATE OF DESERET

Salt Lake City was founded in 1847 by The Church of Jesus Christ of Latter-day Saints. Upon arriving in the foothills above Salt Lake, the Church's leader Brigham Young declared "This is the place." Within four days, he had chosen the site for the Church's Salt Lake Temple and designed the city's grid layout, centered on the Temple. The pioneers called their new state "Deseret" and the population swelled with an influx of religious converts, making it one of the most populous cities in the American West. Meanwhile, the U.S. was engaged in the Mexican-American War which concluded with the Treaty of Guadalupe Hidalgo in 1848. The treaty ceded territory (incuding the area that would become the state of Utah) to the U.S. In 1849, Congress established the Utah Territory.

THE UTAH WAR

Polygamy made relations between the Utah Territory

and the U.S. government tense for much of the mid to late 1800s, peaking in the late 1850s with the Utah war-a series of small skirmishes between Latter-day Saint militias and Federal troops. Under the guise of protecting the Overland Mail route, President Abraham Lincoln stationed 3.000 soldiers in Salt Lake City, where they established Camp Douglas above what is now the University of Utah campus.

THE SILVER BARONS

Because the soldiers had little to do, their commander Col. Patrick Connor directed the troops to prospect for minerals in the valley and in the hills. Brigham Young had prohibited his followers from mining and prospecting, not wanting to subject his community to the boom and bust cycle of an economy built on mining. As a result, Connor's men uncovered rich veins of silver, copper and other precious metals that would lead, along with the coming of the Transcontinental Railroad, to the rise of the Silver Barons in Utah.

The Railroad and Silver Barons would begin to change Salt Lake. Railroad workers of many races and nationalities established enclaves in Salt Lake City, where today bastions of

S ORIENTATION

these immigrant communities-Greek Town, China Town, Japan Town-still exist. The Barons, mostly from back East, spent lavishly on mansions that today line Salt Lake City's South Temple Street. (The Utah State Governor's Mansion was built by silver magnate Thomas Kearns). It was during this boom time that in 1890, the Church of Jesus Christ of Latter-day Saints issued "The Manifesto." which ordered its members to obey the federal government's marriage laws. Thus, Utah was able to achieve statehood six years later.

THE BEEHIVE STATE

The old mining claims would become privately-

owned ski resorts, providing the jet set with a reason to skip Colorado. In 2002, the Winter Olympics thrust Utah into the spotlight, with Salt Lake City at the center of it all. A clean, walkable bike-able metropolis with a progressive city government, Salt Lake attracts talented and creative people from around the world.

The food scene has exploded along with a healthy nightlife. Art, music and creativity are thriving in what was once considered a sleepy backwater.

The surrounding communities and neighborhoods have also flourished, creating a vast metroplex of unique neighborhoods and districts. All draw upon the valley's place below the Wasatch Front Range and celebrate a tradition of good clean living, where open minds and generous spirits intersect. As you will see in the next pages, Salt Lake is now a place where diverse pastimes, cultures and landscapes come together in the modern mountain hub of the West.

GETTING AROUND

You don't need your GPS in SLC. The city is built on a grid, and public transit abounds. You'll soon learn that Salt Lake is a web of interconnected neighborhoods.

WHAT'S UP WITH THE ...

Orange Flags? Grab a flag when you cross busy streets and wave it proudly to alert motorists. The crosswalk flag program has resulted in a 30 percent decrease in pedestrian accidents.

Chirping Signs? Our downtown crosswalks chirp with two different signals indicating when it's safe to cross.

Green Bikes? A great way to tour SLC's downtown is on a snazzy bike (with bike basket). When you're done, just return it to one of 47 stations located throughout Salt Lake. A GREEN-bike day pass is \$7, providing pass holders with an unlimited number of 30-minute rides in a day. Worried about navigating hills? GREENbike offers ebikes too!

Dockless Scooters?

Pick up a scooter where you find it, or download one of many scooter apps to locate one. Unlock with an app (apps vary with scooter company), pay via credit card per minute of ride, and leave it anywhere you'd like. No docks required.

Blue Parking Robots? Just key in the number in front of your car, swipe your credit card, hit a couple buttons and be on your way. It's even easier using the free ParkSLC app on your smart phone. The machines also accept coins if you're committed to the quarter-and-dime route, but do not accept paper money. (*parkingslc.com*)

HISTORY OF SALT

Salt, one of the most common elements on our planet, is essential for all life. It has played a starring role in world history, our health and our religious and cultural traditions.

It is interwoven into our sense of place here in Salt Lake. It's the star of our city in many ways, from the name of our vibrant capital city to the famous Great Salt Lake, not to mention the Bonneville Salt Flats, globally noted for numerous land speed records.

As far back as 6050 B.C., salt has been an integral part of the history of the world and a fundamental element in the rise and fall of countless civilizations. Egyptian art records salt use as early as 1400 B.C.

Throughout history, salt has been highly valued and

even used as currency. In fact, the term "salary" was derived from the word "salt." Salt gave rise to great cities around the world. Countless treaties and wartime strategies revolved around the making or denying of salt, and it was closely tied to the rise of power and dominance by rulers.

Salt is also the subject of generations of lore, tales and idioms. Terms like 'not worth his salt' and 'salt of the earth' abound. In many civilizations, salt has been extensively used for the improvement of luck, wellbeing, cleansing, purifying and clearing negativity. We offer you our "gift of salt" via an array of diverse pastimes, intriguing experiences and our inclusive culture - as a welcome to our unconventional city.

Nestled at the end of Little Cottonwood Canyon, Alta's base area sits at 8,530 feet. Most slopes are north-facing, which preserves the 547 inches of average season snowfall of light, dry and deep snow. Glaciers formed the mountain's two sides. This left the top with steep slopes and more mellow terrain at the bottom, making for fantastic beginner and intermediate runs. Smiles and passion have always been prevalent at Alta since 1938, the first year Alta started spinning the original one-seat Collins lift.

Alta started as a mining town in the late 1800s. Once the mines dried up, three Norwegian brothers, Corey, Sverre and Alf, hand-selected Alta's ski runs. Alf Engen was hired by the Forest Service to determine if the slopes would make for a viable ski area. In 1938 Alta Ski Area opened with one stipulation from their partner, the Forest Service. To operate on Forest Service land, Alta had to revegetate and plant trees on Alta's barren slopes to maintain the environment as it had been before the miners.

Fast forward to today, Alta has made good on that promise, planting over 50,000 trees and 69,574 native plants since 1991 through the efforts of the Alta Environmental Center.

There are precious few places in the world like Alta. The ski area and its small town at the base grew organically around a shared love of skiing. Despite welcome upgrades to higherspeed lifts and direct-to-lift passes, Alta remains proudly rooted in its past. The soul of Alta was founded on wooden skis, in woolen gear where skiing was just a way of life. Skiing is still a way of life for Alta skiers which is why we like to say, "Come for the Skiing, Stay for the Skiing." Sorry, no snowboarding allowed.

NEW ADDITIONS TO ALTA

Alta has not seen much change over the years. The trees are taller, the lifts a little faster (a new Sunnyside high speed six-pack lift was added in 2023) and the same powder skiing and mountain views are still being enjoyed by all. Alf's restaurant expanded in 2021, giving us more space to spread out at our favorite mid-mountain day lodge. After lunch at Alf's, you can hop on the Supreme lift. A few years ago, the Supreme lift and Cecret lift were combined with a new loading station located just outside of Alf's. Last season, an additional Alta Ski Shop was added over on the Albion side. They offer ski rentals, Alta souvenirs, custom boot fitting and more.

SUSTAINABILITY EFFORTS

The Alta Environmental Center (AEC) was created in 2008 to guide the ski area's efforts to preserve the natural environment in which Alta operates. Summer is a busy time for the AEC with tree and seedling planting, tree harvesting, bird surveys, invasive weed pulls and more. The AEC has helped Alta with restoring over 4,000 square feet of wetlands. To date, the AEC has offset Alta's carbon footprint by 94 tons with solar panels, an EV charging station and a Leeds certified building. As a result of some ski run improvements on Sunnyside, the AEC worked to revegetate the disturbed land. They also re-

TOP RUNS

Alta's most classic line is Alf's High Rustler named after legendary Alf Engen, director of the Alf Engen Ski School for over 40 years. You can look up from the Wildcat parking lot and see the straight, perfect fall-line run dropping 1,200 vertical from top to bottom. Do not miss Ballroom when the rope drops after a storm. This intermediate powder bowl is below Mt. Baldy and holds snow perfectly. You will find fellow powderhounds skiing alongside you. If you are up for a challenge that includes a hike, head to Gunsight. The steep entrance can be intimidating, but it is well worth it.

EAT AND DRINK

Alta has three day lodges with restaurants. Watson Café is located mid-mountain off the Collins lift and serves its famous chili daily. Alf's Restaurant is on the other side of the mountain serving hot hamburgers, fries, soups and hot/cold sandwiches. At the Albion base, Albion Grill serves daily specials. If you are a coffee lover, check out Baldy Brews in Watson's for espresso and steamers. Enjoy a sumptuous meal at Snowpine Lodge's Swen's Restaurant.

SNOWBIRD Flying into the future at the 'Bird

IF SNOWBIRD'S NEIGHBOR Alta is a nostalgic throwback, Snowbird is all about the future. A sprawling resort served by an impressive array of high-speed chairs and its brand new tram, complete with floor-to-ceiling windows and a rooftop balcony, Snowbird is a playground for those who like it fast, steep and deep.

The experience of skiing and snowboarding at Snowbird is thrilling. The 125-capacity Tram drops you off atop Hidden Peak at 11,000 feet above sea level revealing a jaw-dropping panorama of high-alpine wonder in any season. To your left is Mineral Basin, a wide-open mix of blues and cliff-hucking black diamonds served by the Mineral Basin and Baldy Express Lifts. To your right is Gad Valley, topped with an imposing cirque that rolls out beneath the jagged peaks of the American Fork Twins. Behind you is the Peruvian Gulch, accessed from the base by Peruvian Lift and, from where you are on Hidden Peak, by North America's only ski tunnel, a 600-foot hole in the mountain below wherein you ride a rubbery conveyer belt between the two sides. The Summit, Snowbird's year-round guest facility located atop Hidden Peak, now offers easy access to skiers, snowboarders or Tram passengers on foot.

Inside The Summit, guests enjoy a hearthealthy menu of French-Rotisserie inspired meals, local Utah craft beers and amazing 360-degree views of the Wasatch Mountains.

Both Alta and Snowbird have the highest snow base counts among Utah resorts, and their north-facing slopes mean that the snow stays around longer. Snowbird will stay open as long as it has snow; some years this has extended its season to the Fourth of July.

Find your groove in any of Snowbird's three main areas. Mineral Basin has a lovely range of cruisers and groomers. Once you've picked your way down from The Cirque into Gad Valley, the mid-Gad runs are a great mix for beginners and experts alike. The newly-renovated Creekside Lodge in Gad Valley now offers new dining. The Creekside Lodge is now

home to Snowbird's famed Mountain School for beginning skiers and snowboarders. A magic carpet located just outside the doors of the lodge helps students reach beginner terrain serviced by the Baby Thunder Lift. For your back to base closeout, Chip's Run is a 7.5-mile blue run that gives you a great ride.

While the thrills on-mountain will fill up your day, the Bird's vibe is most apparent on the sunny Tram Deck, an energetic and convivial central plaza where everyone gathers for midday breaks and post last-Tram boasting. Grab a beer and some refueling snacks from The Birdfeeder to share with friends on the Deck. It's a clubby atmosphere but by no means exclusive.

THE REST OF THE STORY

Skiers and snowboarders from around the world flock to experience the Bird's steep powder slopes, but beginner and intermediates will find plenty of terrain. The brand new Aerial Trams, Snowbird's crown jewels, whisk skiers up 2,900 feet in just 10 minutes to Hidden Peak—the top of Utah's longest vertical rise. Two new lifts have cut ride times in half to some of the Bird's best terrain.

Ted Johnson and Texas oilman Dick Bass opened Snowbird in December 1971 with the dream to create a year-round resort for the "enhancement of body, mind and spirit." More than just a ski destination, Snowbird also provides an equally impressive experience off the slopes. Only The Cliff Lodge, Snowbird's flagship hotel, offers easy ski-out/ski-in access, a world-class spa, heated swimming pools, three restaurants and two lounges.

THE VIBE

Mind-blowing bowls, chutes and glades have always attracted the expert skiers and riders to Snowbird, but the mountain scene has grown to become a more diverse crowd. There's a slice of paradise for everyone, whether you are the dedicated local or a family vacationing at the resort. From steeps that never stop to family-friendly skiing areas, Snowbird makes it easy for everyone to enjoy time on the mountain.

FOR KIDS: SNOWBIRD'S SKI SCHOOL

Snowbird's options for children start at the beginning. Superior Childcare is a state-licensed facility. Children from six weeks to 24 months of age may be cared for in the nursery where the staff-to-child ratio never exceeds one to four. Childcare for kids age 2 to 12 years includes outdoor and indoor activities such as arts and crafts, games, free play, hot lunches and morning and afternoon snacks. For the kids who are ready to ride, there are a multitude of options geared for literally every ability level and age starting at age 3. From Mini Miners Camp in the family-zone to Baby Thunder area to exploring natural and man-made features, Snowbird has your kids covered. snowbird.com

THE RUN

For some of the best of the Wasatch, head to the top of Little Cloud Quad via the scenic Aerial Tram and over to Road to Provo. This traverse brings you to a gold mine of options. Intermediates can follow the traverse to Mark Malu Fork, a blue groomer bringing you down to the bottom of Little Cloud, with the option to continue to lower parts of the mountain.

For the more adventurous, continue to Last Choice and to Knucklehead Traverse. On a powder day, keep going across to find some untracked stashes.

EAT AND DRINK

Whether it's a burrito to fuel up before the first morning tram or a sandwich for lunch, the General Gritts Deli (Snowbird Center, Level 1) is a local favorite. Grab a snack or hearty lunch at the on-mountain Mid-Gad Restaurant. For visitors looking to stay for dinner, be sure to check out SeventyOne (The Cliff Lodge, Level 2), featuring American grill favorites, an open kitchen, a gorgeous year round patio and a retro vibe.

BACKCOUNTRY

Skiing and riding (for the avalanche aware)

BACKCOUNTRY SKIING AND RIDING

(a.k.a. alpine touring) is the fastest-growing segment in the snowsports industry for a number of reasons (not the least of which are the incredible advancements in and the availability of necessary equipment). Combine that with the simple desire to escape the crowds, incredible access to unparalleled scenery and famed Utah powder—particularly in the Wasatch Mountains—it's easy to see why so many skiers and snowboarders are now into "earning their turns."

Backcountry skiing and riding also don't require a lift ticket or season pass; simply head up one of the many canyons with a designated trailhead, ensure your avalanche beacon and your partner's beacon are on and working before you start climbing. If you're new to backcountry skiing and want to try it without the initial investment, or you're visiting and didn't bring your own equipment, there are a number of local shops where you can rent gear and hire a certified guide.

In addition to equipment that simplifies traveling uphill (or "skinning"), to access the solitude and untracked powder skiers and boarders dream of, some more essential gear is required. This includes the aforementioned avalanche beacon (transceiver), a shovel, a probe and a backpack that will carry all of this gear comfortably. However, the most important piece of "equipment" cannot be purchased, only earned. It is invaluable to those venturing in backcountry terrain: knowledge. Specifically, knowledge of how to travel safely in uncontrolled terrain and how to use the tools every person venturing into the backcountry—or beyond the resort's boundaries—MUST have.

If you decide to venture into the backcountry, check all relevant avalanche conditions first. Here in Utah, we are fortunate to have the Utah Avalanche Center (utahavalanchecenter.org), one of the world's preeminent organizations for educating backcountry skiers and riders, offering the requisite daily information to "keep you on top." One of the UAC's most successful projects to keep backcountry skiers and riders safe is its "Know Before You Go" avalanche awareness program, a free onehour tutorial every skier and rider planning to venture into the backcountry should take. The UAC also offers daily easy-to-digest avalanche forecasts, critical information to have in the ever-changing conditions of the Wasatch Mountains.

Backcountry skiing is fun, rewarding and offers incredible skiing, riding and scenery, but before taking advantage of our amazing terrain, we encourage you to be safe and always BE PREPARED!

THE SCIENCE BEHIND THE GREATEST SNOW ON EARTH™

UTAH HAS THE Greatest Snow on Earth[™]. And yes, weather forecasting technology has proven that our great snow is not a myth it's a reality we experience every winter. Believe it or not, most Utah snowflakes are "defective, poorly formed and broken when colliding into other snowflakes." There's no doubt about it—Utah's snowflakes are weird and while no two snowflakes are alike, no other snowflakes are like Utah's.

Why is Utah's snow so great—the lightest, the driest, the most powdery? You may have heard about the lake effect, which occurs when the difference between the temperature of the relatively warm lake's surface and the cold air above the lake collide to create these special conditions. When this difference in temperature is great enough, moisture and heat from the lake's surface rise into the lower levels of the atmosphere and generate snowfall. But actually, that only accounts for about five percent of the annual snow in the Cottonwood Canyons. Besides the vaunted lake effect, Utah snow is great because of its water content—not a lot—and the pattern of its fall. Snow that's less than seven percent water is considered light, and Utah snow has an average density of 8.4 percent—perfect for powder skiing.

The key to our amazing snow is a quickchange temperature fluctuation common to Utah snowstorms. Often a storm starts when it's warmer, which creates a waterdense base layer, and as the temperatures drop, lighter snow follows. This is called "right-side-up" snowfall—the fluffy stuff stays on top. So, add topography plus storm temperature, plus depth, plus frequency and you have the recipe for the Greatest Snow on Earth[™].

And remember—even if you aren't a skier— there are other ways to experience Utah's famed snow. Fat Bikes, snowshoes and winter hiking are all ways to take advantage of Utah's famed powder.

BIG COTTONWOOD CANYON

If you think Utah is a desert, you're in for a surprise in the nearby Wasatch Mountains. Big and Little Cottonwood canyons offer classic alpine experiences—hiking and biking through aspen-shaded trails, fly fishing and chairlift rides with spectacular views. But, you can also choose to be pampered at one of the world-class resorts.

EAT AND DRINK

At Solitude Resort, **Honeycomb Grill**, (solitudemountain.com), offers dynamic, contemporary American cuisine using fresh, locallysourced and sustainable ingredients along with a cocktail list. The best part? Mountain views. For breakfast or an après-hike refueling, try **Silver Fork Lodge** (silverforklodge.com) or **Haus Pizzeria & Creamery** (solitudemountain.com) for fresh coffee or espresso, pastries or a pizza. If the kids need a good-camper reward, order hand-packed ice cream cones.

PLAY

No better way exists to enjoy the Wasatch Mountains than to hike or bike them. **Solitude Village** offers high-altitude mountain biking via the Sunrise Chairlift. Featuring over 20 miles of tree-lined trails, Solitude has some of the most scenic and accessible single track in Utah. Sunrise Chairlift operates three days a week, but guests are welcome to pedal up seven days a week during fall daylight hours. The Brighton area offers hiking for all levels. **Silver Lake** has a trail and boardwalk around it, perfect for an easy walk, duck feeding, birdwatching and trout fishing (with a license) and maybe a moose sighting (see sidebar). The trail to

Desolation Lake is a long but rewarding hike back to some amazing high-alpine scenery. For the more hardy, a hike to Lake Blanche in the middle of the Twin Peaks Wilderness is a must. Information on hikes is available in town at REI (rei.com) and Springbar "Home of Jack Kirkham's Original Canvas Tent Designs." (springbar. com) or at the info HQ at Silver Lake (fs. usda.gov).

GETTING THERE

The mouth of Big Cottonwood Canyon is served by the I-215 Belt Route and Wasatch Boulevard.

WHAT THE LOCALS KNOW

If camping is your thing, two national forest cozy wooded campgrounds are available, including Tanners Flat and Albion Basin campgrounds. reserveamerica.com

MOOSE IN THE MOUNTAINS

Both Little and Big Cottonwood canyons provide habitat for moose. Hiking trails in either canyon comes with the possibility that you might see one of these majestic creatures. As exciting as that can be (and is) beware, moose are dangerous, especially during mating season in late summer and early fall. If you come across a moose, appreciate from afar and give them plenty of room. The boardwalk around Silver Lake is a hot spot for moose sightings.

SKI BIG COTTONWOOD

The two resorts in Big Cottonwood Canyon—Brighton and Solitude both share the canyon's signature wide-open runs. Brighton is known as a friendly hill, especially inviting to learners while Solitude's access to side-country and in-bounds hiking make them both worth a visit.

SOLITUDE

The name says it all

JUST 34 MILES from the Salt Lake City International Airport, Solitude has something to offer skiers and riders of all abilities and features more than 1,200 acres of terrain, ranging from groomed runs to powder glades in one of North America's snowiest canyons.

Solitude provides two convenient and accessible base areas: Moonbeam offers day visitors easy access to a full range of services and amenities while Solitude Village is home to the resort's lodging, fine dining and spa. Moonbeam services day skiers and riders while the village area is home to the resort's lodging guests. From the Moonbeam base you'll have easy access to the Moonbeam and Eagle Express Chairlifts and, from there, Solitude's expansive and varied terrain, on-mountain dining and Solitude Village. Moonbeam Express serves much of Solitude's beginner terrain, and you'll find eager ski schoolers playing follow the leader. Eagle Express Chairlift runs above a number of solid-blue runs, some groomed and some left au naturel, as well as a few expert options.

From Solitude Village, the Apex Express Chairlift provides easy access to the realigned and upgraded Summit Express Chairlift, which takes you to the top of the mountain. Summit Express opens up Solitude's most daunting and rugged terrain, the famed Honeycomb Canyon. On a powder day, Honeycomb's steep chutes and glorious tree runs feel more like backcountry than in-bound resort skiing. Sunrise chairlift also runs out of the village base area and its easier blues and greens are a great place for learners to work out the kinks.

Seeking an alternative to alpine skiing or snowboarding? Solitude's Nordic Center offers nearly 20 kilometers of groomed Nordic trails in addition to 10 kilometers of snowshoeing trails.

THE REST OF THE STORY

Maybe it's by design or maybe it's a selffulfilling prophecy, no other Utah resort is more aptly named than Solitude, where lift lines are scarce and elbow room on even the main runs is plentiful. Lack of crowds, a trail mix of 10% beginner, 40% intermediate and 50% advanced/expert, along with a wide variety of comfortable lodging, dining and après options make Solitude one of the most family-friendly resorts in the state.

Solitude was first developed for skiing by Utah uranium tycoon Robert M. Barrett in 1957. Legend has it that Barrett decided to start his own ski resort after being kicked out of the bathrooms at Alta Ski Resort, which were reserved for Alta guests only at the time. The DeSeelhorst family purchased Solitude in 1977, adding Utah's first high-speed, detachable quad chairlift and upgrading the base areas. After being purchased by Deer Valley Resort in 2015, Solitude became part of the Alterra Mountain Company in 2018 and is an inaugural destination on the Ikon Pass.

Solitude's quaint, European-style village offers a variety of hotel rooms, individual condominiums, townhomes and private homes. All homes and condominiums feature full kitchens, comfortable living areas, concierge services and complimentary parking. Lodging guests can enjoy Club Solitude's heated outdoor swimming pool and hot tubs, plus many family-oriented activities.

THE VIBE

Don't be fooled by Solitude's Currier-and-Ives vibe with a quaint, European-style base village. You'll likely have Honeycomb Canyon's bowls and chutes to yourself. For backcountry skiers, Solitude's summit gates have some of the best access to stadium-sized cirques and closet-tight chutes in the Wasatch Range.

THE RUN

The longest (and most scenic) slope is Woodlawn from the top of Summit Express to the bottom of Eagle Express.

EAT AND DRINK

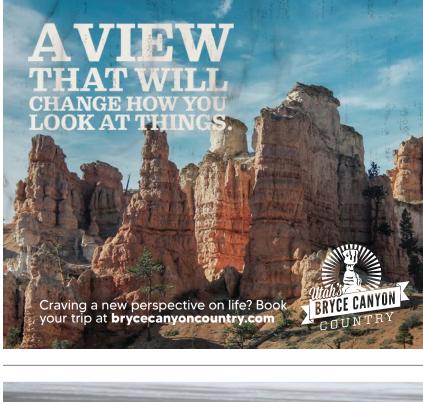

Moonbeam Lodge lets you maximize your day on the hill with convenient breakfast and lunch options, plus wraps and sandwiches to go, to fill you up and get you on your way. Argenta Pub offers a selection of cold beer and guick snacks with rooftop seating. Up the mountain, Roundhouse serves Himalayan and Wasatch-inspired food with generous outdoor seating on its wraparound deck. Last Chance Southwest Grill features burgers, tacos, and Southwest-inspired salads with takeout options and a sunny ski beach. In Solitude Village, enjoy mountain views while savoring Honeycomb Grill's contemporary cuisine, including its famous bison burger and bison chili, or order ahead and get your meal to go! For a guick grab-and-go meal, there's Stone Haus Pizzeria & Creamery. Thirsty Squirrel pub offers craft beers along with wine, cocktails and appetizers for your après enjoyment. For a memorable dining experience that begins with a snowshoe trek through a moonlit forest, be sure to visit The Yurt at Solitude.

SHOPPING

Promised a postcard or need a brag-worthy jacket? You've got three great shopping options at Solitude. Grab branded memorabilia and winter gear like goggles, hats and pants at Moonbeam.

FOR KIDS: THE ALL-FAMILY OUTING

Solitude Ski & Ride School offers children a safe and exciting learning experience, with skilled instructors who utilize small, age-appropriate group sizes, games and fun to help children develop confidence on the snow and improve their technique. Adult offerings include group lessons, specialty clinics and Hidden Tracks, a unique guided tour to explore the "nooks and crannies" of Solitude's world-class terrain.

BRIGHTON

A Ski Resort for the Young and the Brash

BRIGHTON is Salt Lake's most charmingly scruffy ski hill. Unpretentious and friendly, its sprawling runs attract a young crowd and a large contingent of snowboarders. It has a well-deserved distinction of being the resort where most Salt Laker's learn to ride.

Brighton is a family affair. Those free tickets for the kids mean generations of Utah natives have grown up bombing down Brighton's runs. The resort offers its "Ski in Three or It's Free" ski school program, which guarantees beginners will learn to ski in three sessions or the classes are, yes, free. And after ski school is out, Mom and Dad can tackle the expert terrain off of Clayton Peak while the little ones hone their skills on the greens and blues below the Majestic and Milly Express lifts. Brighton shares a boundary with Solitude and offers a pass that allows you to access both resorts. It's also home to Salt Lake's only night skiing without a resort stay-more than 200 acres of lighted runs to extend your day. New this year is a 400-foot long "Catepillar" surface lift that provides access to new beginner terrain.

Brighton's laidback vibe is most evident in its base area, which is a no-frills mix of family cabins in full-on alpine A-frame styles and its friendly watering hole, Molly Green's Tavern. Brighton keeps it simple—burger, beer, nachos—on a sunny patio for your midday reprieve. Because, after all, you came here to ski, board and have fun, why make it complicated?

THE REST OF THE STORY

What's probably most impressive about Brighton is what it's not. The base area is more about function than aesthetics, and don't expect someone to take your skis or snowboard off your car here. You won't see a lot of ads touting Utah's oldest resort either. This is all by design. Brighton's focus is on snow, terrain and value.

The upside of Brighton's no-frills operation is its no-nonsense access to the goods. One hundred percent of the mountain can be accessed by a high-speed quad. It's one of the few mountains in the country where friends and families can ride together on the same lift and then peel off onto different trails—beginner, intermediate or expert—and all meet at the bottom to ride the lift together again. Most skiers and riders stick to Brighton's expertly-groomed trails, but you'll also find plenty of trees, chutes, cliffs and natural terrain parks all within bounds for those who like to whiteknuckle it a bit.

Night skiing is another advantage of visiting Brighton. More than 200 acres, three lifts and the main mountain terrain park are open six nights a week from early December through March. And if you ask anyone in Salt Lake where the best place to learn to snowboard is, chances are they'll say Brighton. The Brighton Ski & Snowboard School has been teaching people to ride for 20 years. The school is also a Burton Learn to Ride Center, and they use specially designed snowboards and bindings which make learning easier.

THE VIBE

Everyone at Brighton is there because of the snow and terrain—you won't find fancy champagne or yoga classes, but you will find a huge passion for skiing and snowboarding with a local feel.

THE RUN

On the far north side of the resort, you'll

EAT AND DRINK

Like the rest of the mountain, dining at Brighton is frills-free. Hearty breakfasts come standard at the base area's Alpine Rose cafeteria. Get your après ski fix at Molly Green's, where the pizza is hot and the beer is ice cold. Protip: Bring a crowd if you opt for the nachos.

EVENTS & MORE

Temple Square is both the cartographic center of Salt Lake City and the heart of the Church of Jesus Christ of Latter-day Saints.On July 22, 1847, after being driven well beyond the U.S. boundaries for their religious beliefs, Church members arrived in what is now known as the Salt Lake Valley. Please note that the Temple and some other buildings in Temple Square will be undergoing restoration for the next few years; some areas may be closed.

Upon the arrival of the Latterday Saints in Utah, Church president Brigham Young famously declared, "This is the place." The pioneers called their new state Deseret, meaning "industry." Within four days, Young had chosen the site for the Temple. It took 40 years to complete.

Temple Square is beautifully landscaped and is the No. 1 tourist attraction in Utah. Three of the buildings on the square were built by the pioneers: the magnificent six-spired granite Salt Lake Temple; the acoustically perfect domed Tabernacle, (the original home of the Choir at Temple Square and the famous Tabernacle organ); and the Assembly Hall with its spires and stained glass windows. Outside the Assembly Hall is the Seagull Monument, a commemoration of the "Miracle of the Gulls" - a local bit of lore about a massive flock of seagulls that arrived in the valley and saved the settlers' crops from a plague of insects. The Conference Center's welcome center offers art and interactive exhibits and a replica of Thorvaldsen's Christus. Private tours of all of Temple Square's attractions are offered in more than 40 languages.

Thorvaldsen's Christus (left) in the Conference Center (below) is a must on your SLC visit.

The Family History Library (35 N. West Temple, 801-240-6996, familysearch. org/family-history-library) is the largest repository of genealogical records in the world, and is free to the public. In the library, you'll find the Discovery Experiences (for current hours, visit familysearch.org). North of Temple Square is the massive 21.000-seat Conference Center (50 W. North Temple, 801-240-0075, templesquare.org) with a waterfall on the south façade and a four-acre garden on the roof. The building hosts the Church's conferences and musical performances and is large enough to hold two Boeing 747s.

TEMPLE SQUARE RENOVATION

The Salt Lake Temple renovation project recently completed the third year of its five year renovation. Most publicly accessible Temple Square buildings will stay open during the renovationso you can still come and enjoy events, performances, tours, dining, and Christmas lights during the holiday season. For the most current information about all of the activities and sites available, including the historic Beehive House and Assembly Hall, the Church History Museum, Family History Library and the famous Tabernacle, visit templesquare.org.

CLIMBING YOUR FAMILY TREE

The Church of Jesus Christ of Latter-day Saints is serious about preserving its genealogy records. All Family History Library record originals are kept at the Granite Records Vault in the mountains near the mouth of Little Cottonwood Canyon, but the digital information is available to everyone. In 1894, The Church of Jesus Christ of Latter-Day Saints started gathering genealogical records to help members trace their family histories. The Church's **Family History Library** (35 N. West Temple, 801-240-6996, familysearch.org/familyhistory-library) is now the largest of its kind in the world. In the library, you'll find Discovery Experiences, an interactive display that allows you to explore and learn about your family history.

Use of the Family History Library is not limited to Church members. Anyone can enter the library and use any of the resources to trace their family tree, free

of charge. More than 300 computers are available for use in the five-floor. 145,000-square-foot library. Resources here include vital records like birth and death certificates, marriage licenses, census returns, property, probate and cemetery records, among many others. The Library welcomes both casual visitors and serious researchers. For the best experience, visit with a clear objective in mind. Do you want a fun, hands-on experience learning about your family, or are you searching for missing ancestors in historical records? Guests are not required to have a free FamilySearch account, but it has benefits and can provide a more rich experience. FamilySearch allows account holders to access more digital images and records, receive record hints, collaborate with others online, and more.

There are more than 4,500 Family History Centers around the world. Find a location or sign up for a free account at familysearch.org.

THIS IS THE PLACE

Another visitworthy Church of Jesus Christ of Latterday Saints historical site is This is the Place Heritage Park. Located 6 miles from Temple Square at the mouth of Emmigration Canyon, the site marks the spot where the original Latter-day Saint pioneers entered the Salt Lake Valley and their leader, Brigham Young, famously declared "This is the place." The park features restored pioneer buildings and many familly friendly activities. Check the website for events and things to do. 2601 Sunnyside Ave., 801- 582-1847, thisistheplace.org

USING THE LIBRARY

Before visiting the library it is important to find as much information as you can about your ancestors. Although not necessary to use the library, it is helpful to set up a free FamilySearch account before visiting at familysearch.org. FamilySearch can assist you before and after you visit the library for your dive into your family's history. At the library, ask the helpful staff and docents for a library worksheet and be sure to bring a big flash drive to save your research.

You can't check out books, but you can make copies. The Library doesn't have its own parking lot, but you can park at nearby garages or pay for on-street parking at the blue meters (parkingslc.com).

For current hours of operation for the Library and Discovery Experiences, visit familysearch.org. familysearch.org.

(5-hour drive)

From the top of the towering West Temple plateau to the banks of the Virgin River, the red and white sandstone cliffs of Zion National Park (*nps.gov/zion*, 435-772-3256) provide sanctuary to life found there. Whether gazing up or looking down, the quiet grandeur of Zion is rejuvenating. Visitors can traverse the high country like desert bighorn sheep, ascend cliffs like peregrine falcons or browse the valley floor like mule deer. In winter, the shuttle buses are gone with the crowds and the main canyon, along with Kolob Canyon to the west and Zion's east side, are all open to traffic. Several sites remain open in Watchman campground (recreation.gov, 877-444-6777) or you can stay at historic Zion Lodge (zionlodge.com, 435-772-7700). **Top Attractions**

Angels Landing Hike: A strenous and somewhat perilous hike to a perch above the birds.

The Narrows: Slosh, in appropriate footware, along the Virgin River between sheer cliffs of red rock.

divided by the rushing Colorado and Green Rivers. Explore the maze-like landscapes for a mosaic of color, form and curve. Petroglyphs show evidence of past human civilizations. The Island in the Sky District provides a bird's eye-view of the canyon labyrinth, while the Needles District takes you into its' depths. Snag a first-come, first-served campsite in either district or return to civilization in Moab (*discovermoab. com*, 435-259-8825 or Monticello (*monticelloutah. org*, 435-587-2271).

"CLASSIC"?

"A classic timepiece, designed for a lady." This is how some may describe our Oyster Perpetual Lady-Datejust. Maybe they're right. Since the early 20th Century, Rolex has designed and crafted watches suited for all women's wrists, with the same standard of excellence as for all the models that have built its legend. Always pursuing a higher standard. So, if "classic" means perpetuating tradition while combining elegance and precision, grace and resistance, beauty and performance, it is indeed a classic timepiece, designed for a lady. The Lady-Datejust.
